HI PERFORMANCE MOTORS LICENSE PLATE FRAME

Beautiful reproduction of this very rare license plate frame originally available at Shelby's Southern California dealership "Hi Performance Motors" in the 60's. Customers couldn't buy new Shelby's there because it wasn't technically a Ford Dealership. But they could buy Cobras, company cars or used Shelby's right from the factory dealership. Only a fraction of all the Cobras and Shelbys were sold through Hi Performance Motors, making these frames highly sought after and extremely valuable.

WILWOOD DISC BRAKE CONVERSION KIT

Designed specifically for the five lug first generation Mustang. Designed to fit many popular stock 14.00" steel and aluminum wheels. 11.30" diameter vented plain face or by special order drilled and slotted rotors. Install on both OE drum and disc brake spindles. Forged Dynalite Calipers provide big clamping power in a truly lightweight, rigid and reliable design. Designed for optimal clearance. Black anodized. Rotors include bearings and seals. Kits include BP-10 metallic-composite compound "Smart Pads". BP-10 delivers the increased friction; higher fade resistance and longer wear of an entry-level track pad, with virtually noise and dust free performance for the street. Caliper brackets, premium grade hardware and detailed installation instructions are included in every kit. Jacketed stainless steel braided DOT approved flex lines are included.

POWER ASSIST

DUAL CHAMBER POWER BRAKE CONVERSION KIT

This setup utilizes a new power brake booster with increased sensitivity, new large capacity dual

chamber master cylinder, specially designed mounting bracket to allow direct bolt in while retaining original brake pedal assembly and clearance of the shock tower. * Note: Booster requires a minimum 15 inches of engine vacuum pressure at idle for maximum stopping power. Some high performance high lift camshafts may not create enough vacuum. Stock engine vacuum pressure is 18 inches. 1 year warranty. Picture for reference only. Check website for actual picture of each kit. *(Note: PBC-M1 & PBC-M2 require notching factory shock tower brace. Export brace recommended.) Will not fit cars with factory power brakes. Installation instructions are not included, as this kit should be installed by a trained professional. We recommend part number PBC-MCL to ease installation. Early cars may also require a brake distribution block. **Note: Original Master Cylinders had Left Hand Ports, a few of the below kits have Right Hand (RH) ports as noted.**

DISTRIBUTION BLOCK WITH PROPORTIONING VALVE

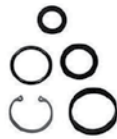

Adjustable proportioning valve and distribution block all-in-one. Simplifies your brake plumbing! Available in a black

anodized or polished finish. Accepts 3/16" brake line. Adjustable proportioning valve regulates rear brake pressure, helping to maintain correct brake bias between front and rear brakes. Easy to turn handle with directional arrows makes it simple to either increase or decrease rear brake pressure. Designed for dual bowl master cylinders. Distribution block connects to the master cylinder and distributes brake fluid to all four wheels. Includes 2 inlets from master cylinder, 2 outlets to front brakes and 1 outlet to rear brakes. Includes 5 stainless steel 3/16" fittings. Includes wiring pigtail for rear brake light switch. Mount to any convenient location. *NOTE: This is not a direct factory replacement for original blocks and some line modifications may be necessary.

ELECTRIC HIGH PRESSURE MASTER CYLINDER

This polished aluminum master cylinder is the answer for Mustang owners with special brake needs. Lack of space because of a big

motor, lack of vacuum caused by big cams, blown or supercharged engines, or are you just looking for a superior looking unit that does not hang out so far from the firewall? This unit is a unique self-contained booster that is not dependent on engine vacuum booster or a steering pump, yet is capable of generating up to 2500 lbs of line pressure. It features a larger bore than most cylinders so it can handle single or multi-piston calipers, but still gives you a solid pedal.

CONCOURS OUTER FRONT BUMPER BRACE

Tired of Bumper Braces that do not fit without bending, grinding and drilling. Our Brackets were copied off of original Ford Blue Prints and our Welding Jigs were created using NOS Ford Original samples. Top Plates feature correct curvature and a slightly oversized hole to allow for both Original and Reproduction Bumper installations. We use thicker walled tubing than Economy Version and our 67-70 Braces feature a correct welded Tabs to hold the rubber Anti-rattle Pads in place for a truly concours reproduction.

CONVERTIBLE TOP WITH GLASS BACK WINDOW

Glass rear windows enhance rear visibility. They are not prone to scratching, cracking, or yellowing due to sun exposure. Robbins heat-seals glass into glass window assemblies using the same equipment and techniques as Ford and other OEM convertible manufacturers. They do not use inferior methods that produce weak bonds, such as gluing them with silicon. All of our tops feature: Assembled header-bow bulb seal, specially treated vinyl to resist mildew, 3 year pro-rated warranty, coated vinyl for extra waterproofing, factory original pinpoint grain, heavy duty YKK nylon zipper, includes wire-on feature strip with stainless tips and screws, and meets motor vehicle fire retardant requirements. Stock colors are black and white, however we can special order Tan, Dark Blue, Brown, and Saddle. Special Order colors are non-returnable and have a \$30 upcharge. 1964-70 rear windows feature Robbins patented "Flex-Hinge" folding seam. 1971-73 are solid glass. 1964-66 must use convertible well liner part number WL-FM-67-BK. Glass rear window and top are packaged in a single box for reduced shipping cost.

CV TOP W/ PLASTIC BACK WINDOW

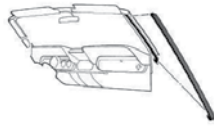

Robbins tops are manufactured using OEM quality vinyl from Haartz, which is

specially treated vinyl to resist mildew. They feature heat-sealed reinforcements for added strength and to prevent shrinkage in panels. Although gluing is faster and cheaper, glued reinforcements often bubble or fail over time. Heat-sealed reinforcements don't. Plastic window is made using the same Haartz vinyl, and OEM quality 40 gauge clear PVC. Stock colors are black and white, however we can special order Tan, Dark Blue, Brown, and Saddle. Special Order colors are non-returnable and have a \$30 upcharge. All of our tops feature: Assembled header-bow bulb seal, 3 year pro-rated warranty, factory original pinpoint grain, heavy duty YKK nylon zipper. RADIATOR CAP W/ ELECTROLYSIS PROTECTION

A special radiator cap that includes a sacrificial magnesium anode that protects aluminum and other soft material engine components from electrolysis. Electrolytic Metal Erosion (EME) is slowly destroying your engine components. EME attacks timing chain covers, radiators, heater cores, intake manifolds, freeze plugs, head gaskets, thermostat housings even cylinder heads causing premature failures. By allowing EME to attack the sacrificial anode, the "Rad Cap" protects your engine while driving or in storage.

1964½-66 MUSTANG V8 PREMIUM 3-CORE, COPPER / BRASS RADIATOR

Get improved cooling efficiency while maintaining the look of original equipment with new Scott Drake premium 3-core copper / brass radiators for 1964.5-66 Mustangs with small block V8's. These high performance radiators are designed to provide superior thermal transfer compared to standard 2 core units. They feature durable copper / brass construction and a high capacity 3 row internal design for long lasting performance. These radiators also include an integrated automatic transmission cooler, an over-flow tube routed off of the upper fill neck, and a petcock drain off the lower tank for easy set up and maintenance. These radiators are designed specifically for 64½-66 Mustangs with 260, 289 and early 302 engines.

FOMOCO HALOGEN HEADLIGHTS

Now available from Scott Drake, FoMoCo Halogen Headlights featuring authentic Ford markings and upgraded Halogen performance. This is a reproduction of a very desirable and rare version headlight used on Classic Mustangs. We took NOS new original Ford bulbs and duplicated them in appearance while improving them with Halogen lighting technology. Halogen headlights produce more than double the lighting power of original Tungsten bulbs. Perfect for drivers or trailer queens, a great safety improvement while maintaining an original look. Over the years Ford offered two FoMoCo script versions: one sand blasted etched logo, and the other a prominent reverse raised FoMoCo logo about 7/8" wide. We chose to reproduce the rare, highly sought reverse raised logo version, which is more attractive and easier to read. Approved by Ford as an official licensed product and packed in cartons of 12.

DELUXE SEQUENTIAL TAIL LIGHT KIT

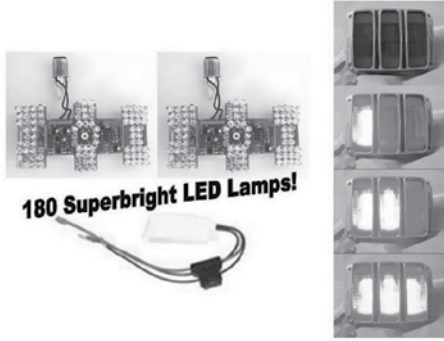

Another new and unique product from Scott Drake. Scott's goal was to provide the classic Mustang with sequential turn signals like the T-birds and Shelby's of the 60's. The inserts alone increase the brightness of the taillamps by 200%. Our sequential light systems come complete with control modules, an electronic variable flasher and 2 dedicated three bulb inserts, ready to install in your taillamp housings. All required electrical connectors are provided. This deluxe kit comes with special polycarbonate lenses. We installed the three bulb inserts into our taillamp housings to make installation just that much easier. Detailed instructions included. Assembly required.

LED SEQUENTIAL TAIL LIGHT KIT (EASY INSTALL)

Drake Automotive Group has teamed up with an industry leader in LED Sequential Tail Light systems for the Ford Mustang. With patented "Smart-signal" technology and exclusive "Batwing" design, these kits offer easy hassle-free installation with no splicing required! These LED's are up to 5 times brighter than stock lights but run cooler and use less energy than traditional bulbs, so they won't melt your lenses. Each kit works with stock lenses and housings, so there is nothing extra to buy. Lifetime warranty! Please note: sequencing speed is not adjustable.

AIR CLEANERS & VALVE COVERS

DOUBLE HUMP HIPO AIR CLEANER

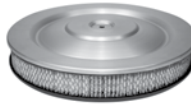

A Scott Drake is proud to announce the release of new reproduction "Double Hump" HiPo Air Cleaner Assemblies.

These authentic units are modeled after the extremely rare 14" air cleaners that were standard on 260s and early HiPo 289s found in 1964-1/2 - 1965 Mustang, 1963 - 1965 Ford Falcon, 1963 - 1964 Shelby Cobra, 1963 - 1965 Ford Fairlane, and 1963 - 1965 Falcon Sprint. Unlike other HiPo air cleaner assemblies, these feature a unique "Double Hump" chrome lid rather than the more common "flat top" lid used on later model HiPo engines. The lid also has two indents to lock the wing-nut in place securely. The base of the assembly omits the breather port and is finished in a semi-gloss black like the originals. Attention was paid to the filter as well to match the original design with a yellow filter element, a round hole perforated screen and orange gasket material to complete the authentic appearance. Make your restoration or clone stand out from the crowd with this premium quality reproduction of the highly sought after "double hump" air cleaner. Like all Scott Drake products, these are backed by the Scott Drake Satisfaction Guarantee.

14" SPUN ALUMINUM HIPO AIR CLEANER ASSEMBLY

Add a custom hot rod look under the hood of your car with the Scott Drake 14" aluminum HiPo air cleaner assembly. These high

performance air cleaners are modeled after the chrome "flat-top" HiPo air cleaners that originally came on K-code Mustangs. These feature a brushed finish aluminum lid, a high flow white filter element and a blue stamped steel base. The base is equipped with a PCV port on the bottom. These are engineered to fit most brands of Ford 2v and 4v carburetors. Like all Scott Drake products, these are backed by the Scott Drake 100% satisfaction guarantee. Note: Air cleaner stud and wing nut sold separately.

WE PROUDLY FEATURE AUTHENTIC MUSTANG REPRODUCTIONS FROM SCOTT DRAKE!

390 GT AIR CLEANER ASSEMBLY

New by Scott drake is the extremely rare 1967 Mustang 390 GT High Performance Air Cleaner without the emissions control tube. This air cleaner is a Concours Reproduction that includes blue base and chrome lid. This is also an excellent stock appearing performance upgrade for the very restrictive 68-70 390-428 Air Cleaners. Some early production 1968 390 GT's may have come factory with this air cleaner. For California Emissions see part C7ZZ-9600-E. Note: the outside dimension of the lid is 16.75" and will not fit the more common 17" versions.

DISTRIBUTOR

IGNITOR CONVERSION

Never change points again, plus increase horsepower and improve fuel economy. Fits entirely under the distributor cap, with no "black box" to clutter the engine compartment. Installs in minutes, and is completely hidden. Other benefits: Test results show the Ignitor delivers twice the voltage to the spark plugs. No limits to coil and spark energy (spark energy is limited by the coil). A 2:1 improvement over "point type" systems in current fall time. Stable timing with no need for periodic adjustments. Increase spark plug life by 2 to 3 times. No contacts to burn, pit and corrode. No moving and rubbing parts to wear out. Better foul weather performance.

HIGH POWER IGNITOR CONVERSION

The Ignitor II takes the Ignitor a step further by adding a powerful new microcontroller, that controls the dwell

period, for the best possible spark over the entire RPM range. Ignitor II offers enhanced performance levels only found in more expensive box type ignition systems. Compared to point type systems Ignitor II develops on average 4 times more available energy between 3,000 and 5,000 RPM, and 2 times more available plug voltage. Higher RPM performance is improved when used with the Flame-Thrower II super low resistance 45,000 volt coil

PERTRONIX SPARK PLUG WIRE SETS

These low resistance, high performance wire sets feature two current paths. One path is spiral wound stainless steel alloy and

the other is a carbon impregnated fiberglass center core. Other features include low 500 ohm per foot resistance. Silicone jackets used to resist high temperatures, moisture, oil and chemicals. EPDM rubber inner insulation for superior heat resistance and prevention of arching and voltage leaks. Fiberglass reinforcing braid for added strength and flexibility. Available in red, blue and black, these spark plug wires come with a lifetime warranty and are made in the U.S.A.

CONCOURS 289 HIPO MOTOR MOUNT KIT

This Complete kit included everything needed for either a 1964-1965 "K code 289 HiPo Mustang or 65 and Early 66 Shelby GT350's. This design is much more stronger than factory 64-66 Mustang Engine Mounts which fail quickly when exposed to excessive Torque and Horsepower. These are exact Copies of the Originals. Includes Lower Cast Frame Brackets with Part Numbers, Intermediate Brackets, Upper Engine Brackets, Main Rubber Mounts, Donut Rubber Isolators and all necessary correct hardware for a trouble free Installation. Originally these Brackets were raw and quickly surface rusted, ours are painted a natural steel color so it will look like new for many years.

Year	Description	Part No.	List
64-65	Complete kit	CSZZ-6028/9-HPK	\$449. ⁹⁵ KI

These Stamped Steel bracket are stamped and formed exactly like original and

an excellent reproduction of the one used on all factory 289 HiPo Cars including Shelybs. This bracket bolts directly to the Block. Painted a natural steel color.

Year	Description	Part No.	List
64-65	Upper Steel Stamped Brackets	C30Z-6046-A	\$99. ⁹⁵ PR

The Cast Iron Brackets are identical to original 289 HiPo Brackets used

on the "K" although similar in appearance to standard 1965 Cast Iron brackets they are not interchangeable and must be used when utilizing other HiPo Engine Mount Components. Original Part Numbers cast into the part. Concours Correct. Painted a natural steel color for longevity.

CAL CUSTOM OIL PAN

Scott Drake is proud to reintroduce the famous "Cal Custom" aluminum finned oil pan that was so popular throughout the 60's, 70's and 80's. It has not been available for Part No.s, but it is back again and now even better than before! Not only do these pans look great fully polished with raised fins but they also offer the added benefit of reducing oil temperature to help your engine run cooler. We have even added a strong magnetic drain plug to help protect your engine from destructive metallic particles floating in your oil. These Oil Pans fit: 260, 289, and 302. Also available "Cal Custom" Aluminum Finned Valve Covers (CSZZ-6A582-AF) and Air Cleaner (CSZZ-9600-AFK)

EXHAUST SYSTEM

HI-PERFORMANCE 6 CYL. EXHAUST HEADERS

We believe that a properly modified 6 cyl. will put out as much usable low RPM horsepower as a V8. We offer both the single and dual outlet versions. Single outlet is recommended if no other modifications will be made. Dual outlets work best with Hi-Po Camshaft, 2V carb and Pertronix Ignitor. Single outlet also works well with these modifications. Dual outlet is for customers that want the look and sound of a V8. We recommend buying an exhaust port divider (part # C3OZ-9430-EPD) which smooths out air flow between the #3 and #4 cylinder. Will fit Mustangs, Falcons, Rancheros, Comets, Fairlanes, Torinos, and Mavericks.

MODIFIED TRI-Y EXHAUST HEADERS

Made by Scott Drake, these Tri-Y Headers resemble traditional Tri-Y's in appearance, with subtle changes to enhance fit and performance! 16 Gauge Tubes are CNC mandrel bent, then carefully installed in our precision engineered welding jig for a perfect fit, and precision welded by a master craftsmen. Many hours have been invested on making these fit and perform. They have been fitted on multiple applications and we find them superior to previous suppliers. These fit both automatic and manual transmissions with the more common 157 Tooth small bell housing, along with extra clearance for starter, mounting flange bolts can easily be accessed and they clear Shock Towers.* Provides full articulation of steering assembly without interference. Note: Power Steering cars require Drop Down Bracket see below. Cars with the larger Bellhousing for 164 Tooth Flywheel will need to dimple header and possibly remove a minimal amount of material on Bellhousing as well for proper clearance. We have also shortened the collector tubes to improve floor pan clearance. Over forty years of Mustang modifications have resulted in endless configurations and combinations, but we believe this product offers the best overall fit and appearance so far. Fits 260, 289, and 302. All Headers include extra thick 5/16 inch flanges to prevent warping which are precision ground. Metal composite flange gaskets, 1 1/2 inch Primaries, 1 3/4 inch Secondary's and 2 1/2 inch Collectors. Includes Reducer Cones which taper to 2 inches with gaskets and all necessary mounting hardware.

304 Stainless Steel

Our stainless steel version features Polished Stainless construction, including the 5/16 inch mounting flange, most manufacturers call their headers all stainless, but actually use regular steel which is nickel plated steel to reduce costs. Ours are all 100% Stainless Steel right down to the flange mounting bolts. The best money can buy, no corners have been cut.

*Note: 64-65 V8 Engine Mounts sit the engine approximately 1/4" lower than the 66 and up mounts. Although unlikely, it may be required to shim your engine up especially if mounts are older and have partially collapsed to gain more shock tower clearance. This can be done simply with some washers.

TRI-Y EXHAUST HEADERS

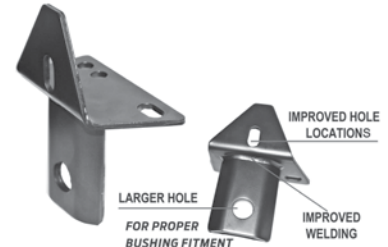

These feature 1/4" flanges, miter cut 16 gauge tubes & are precision Mig welded to ensure a proper fit & eliminate exhaust leaks. Comes boxed complete with premium gaskets, all necessary mounting hardware & reducer cones. Fits 260, 289, and 302.

CONCOURS EXHAUST SYSTEM

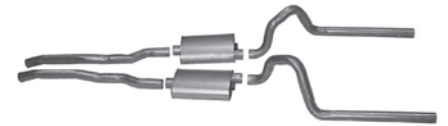

We now offer the most comprehensive line of exhaust products for 1964 -1973 Mustangs and 1965-70 Shelby's. These Exhaust products are of premium quality and made to original factory specifications in the USA. All of our products have been test fitted on the appropriate Mustang prior to production to insure a trouble free installation. We use only the heaviest gauge aluminized tubing available. Mufflers have correct factory brackets when needed and are also aluminized to eliminate early rust out. All Kits are compression bent just like originals for that Concours look. H-Pipes or Y-Pipes not included and Hanger kits are sold separately.

PERFORMANCE EXHAUST SYSTEM

These Exhaust products are of premium quality and made to original factory specifications in the USA. Only the heaviest gauge aluminized tubing available is used for these Exhaust Systems. Mufflers have correct factory brackets when needed and are also aluminized to eliminate early rust out. All Kits are compression bent just like originals for that Concours look. H-Pipes and Hanger kits are sold separately. This has exact same bends and Curves as original 2" Exhaust systems. If running Factory GT Exhaust Tips modification is required on end of Tail Pipe and Exhaust Tip. Also due to very tight clearances on Convertibles in the Seat Pan Reinforcement Area. Professional Installation is recommended especially for Convertibles.

LEMANS STYLE ALUMINUM GAS DOOR

This beautiful polished aluminum race style gas door is inspired by the gas caps found on vintage Shelby Cobra race cars. This trick flip-open design functions like the originals used in 1960's racing for quick refuel "pit stops". The outside diameter of the base is smaller at 5.25" to fit on the 64-66 Mustang tail lamp panels. The unique Scott Drake design of the gas door allows installation in four different mounting positions using the factory holes and retains use of the factory fuel filler neck for easy installation. A simple flip of the trigger mechanism pops the door open exposing the twist on gas cap. Gas door has a bright polished finish and includes stainless steel hardware and a twist on gas cap. Note: Will fit 67-68 cars but access to the trunk lock is limited and requires opening gas door to use trunk key. 69 cars have similar trunk lock clearance issue and minor modification would be required on the back side to fit flush against tail lamp panel.

STEERING

CORSO FEROCCE SHELBY STEERING WHEEL

This new Corso Ferocce steering wheel is a stunning replica of the wood rimmed steering wheel originally equipped on the 1967 Shelby GT350 and GT500s. It features a beautifully finished real solid wood with proper finger indents on the back and a black band around the bottom surface just like the originals. The sporty 3 spoke design is brushed stainless steel with 4 chamfered holes per spoke and unique black rubber finger guards. The main center hub is CNC machined aluminum with a satin finish. Concurs correct GT350 and GT500 horn button assemblies are available. We also have a Mustang Horn Button option as well. Each wheel comes equipped with a 65-67 mounting hub. 68-73 Adapter Kit coming soon.

RALLY PACS WITHOUT IDENTIFIERS

Scott Scott Drake is proud to announce the latest addition to our popular line of 1964-65 Mustang Rally Pacs. This new addition is solid black and features a plain black center emblem with no other identifiers. When Ford first introduced the Rally Pac it did not have the Logo so all 1964's and many early 1965's that rolled off the assembly line with the Rally Pac option did not have a logo on it. Late 1965's and all dealer add-ons and over the counter Rally Pacs had the Logo. Scott Drake Rally Pacs are the only ones that work with most modern ignition systems!

1967 UNDER DASH GAUGE POD

ASSEMBLY

We are proud to have the Scott Drake name on this Gauge Pod Assembly, an authentic reproduction of the original 1967 Shelby under dash gauge pod! Features Stewart Warner green line gauges and a tough, crinkle coated housing. Includes oil pressure & Amp gauges, mounting bracket, face plate, and all hardware and connectors needed for proper installation. Fits 1967 Shelby and 1967-68 Mustangs without center console. Universal fit for other under dash applications may also be possible

RETRACTABLE 3-POINT SEAT BELT

This product allows you to convert your 1964-67 Mustang Coupe, Fastback or Convertible's seat belts to a safer, modern 3-Point design. This is today's technology for yesterday's classic car. This Seat Belt Kit comes complete with all the hardware needed along with instructions to guide you through the installation. Available in a variety of colors. This Kit will also work on 68-73 Mustangs, but if you use existing roof mounting point, the webbing may be too short for some Drivers. For 1968-73 customers looking for a more original appearance and wishing to use their factory Roof mounting point we offer SB-3P-BK-PBSB in Black only. All of the Seat Belts are made in the USA and are built under the current Governments safety guidelines. **1 kit does both seats.**

CONCOURS WINDLACE

By Scott Drake, an exact copy of previously unavailable Windlace used by Ford in the mid to late

1960's. Only available in black, this PVC Windlace snaps in with ease and features the commonly known "Weave" pattern. Please note Ford used a couple different suppliers of Windlace and their patterns were not identical. Our research found Windlace varied year to year and possibly even month to month depending on vendor supply issues. We also found variances between assembly plants. Please check your original Windlace to make sure this is right for you. Sold by the foot, Fastbacks and Coupes require 16 feet and Convertibles only require 10 feet. For cars that have the Sierra Grain patterned Windlace we have a reproduction that is very similar in appearance and is available under part # C5ZZ-6502906-BK.

DOME LIGHT ASSEMBLY

We made a bright chrome base with a brighter than original bulb to really improve lighting inside the car. We include

instructions on how to easily add this dome lamp to earlier Mustangs that didn't have this feature. Our dome light assembly can even be mounted up under the back deck to make a great trunk light. Our reproduction dome lens and chrome bezel as well as the mounting hardware and electrical connectors are included to make this a quick and simple project.

THE DEFINITIVE SHELBY MUSTANG BOOK

Each year of Shelby Mustang production is isolated and examined in-depth, with explicit descriptions of how these great cars came to be. The various options, modifications, and upgrades are shared in full, with intriguing behind-the-scenes facts and documented issues on full display. The problem Shelby faced and conquered makes the final products all the more interesting and atypical of other limited production automobiles.

OUTSIDE MIRRORS

1964-66 MUSTANG CONCOURS OUTSIDE MIRRORS

Scott Drake Show-Quality Mustang Mirrors are the best on the market! Our mirrors feature flawless chrome, perfect details and a perfect fit. These mirrors fit both RH and LH side, but we recommend our convex glass mirrors for the RH side for a greater field of vision. Available in 2 finishes for an original or custom look: chrome, or satin chrome. All Scott Drake mirrors come complete with a new base pad and mounting screws. We now offer a long C3RZ base for a custom look on 67-73, also an ideal way to cover-up pre-existing holes from an incorrect mirror on 64-66.

RH SPORT MIRROR CONVEX GLASS

A New by Scott Drake is our 1969-73 Mustang Convex Sports Mirror Glass. Our convex mirror glass is designed to be used

on right hand (passenger side) sports mirrors to help eliminate the blind spot associated with original flat glass. The mirror glass can be installed directly over the original mirror glass. This will allow for removal of the convex glass if you want to return the Sports mirror back to its original state. Note: will not fit left hand (drivers side) mirrors.

MUSTANG MIRRORS WITH LED INDICATORS

Scott Mustang Deluxe Remote Mirror Kits with LED indicators! Modern

cars have LED indicators built into both mirrors for safety. Classic cars and especially Mustangs have a lower profile than most modern cars. Make sure that your car is noticed when you change lanes with our new LED turn signal indicating mirrors. This safety feature helps prevent side collision accidents by giving cars in your blind spot plenty of warning if you need to change lanes. The LED Mirrors are made with our Show Quality Reproductions and look factory correct. Superbly detailed to pass even the most critical inspection. RH side is also made using Convex glass to improve your field of vision. Equipped with patented electronics these reliable LED turn signal indicators blink only when they are supposed to which is when you activate your turn signals not when you hit the brakes like all other kits. Super simple hook up in to existing turn signal wiring with NO special or complicated control boxes to worry.

ACCUMATCH™ INTERIOR DYES

This proprietary formula is approved by Ford and meets Ford OEM performance specifications. It penetrates and chemically bonds to any clean surface. Will not crack,

flake or peel. This does it all: Vinyl, Carpets, leather, hard plastic, exterior trim, convertible tops and metal. Really anything associated with a vehicle. Actually penetrates and chemically bonds, will not crack, flake or peel. Quick Drying formula, so parts can be touched and installed in as quick as 10 minutes. Will not fill in grain pattern. Truly an OEM finish in an aerosol can. Yes a little more money but well worth it. When painting the outside of your car, do you typically buy the cheapest paint you can find? LP-383 and PP-2322 are recommended for professional results.

RTM - FIBERGLASS SHELBY HOOD

These Fiberglass Hoods are manufactured using the RTM method (Resin Transfer Mold), which produces a consistent part in both fit and appearance unlike chopped or hand-laid fiberglass hoods that vary from part to part. Also, although not concours in appearance for original Shelby's, the RTM process gives a clean factory appearance underneath, rather than a typical aftermarket fiberglass hood. It will still require additional prep work compared to sheet metal hoods.

POWER STEERING AND RACK & PINION KITS

POWER STEERING CONVERSION KIT

The conversion box is a remanufactured modern integral power steering gearbox. It provides true modern power steering feel, feedback and sporty 16:1 ratio. It has been remanufactured to bolt directly to the factory mounting location and to fit the stock pitman arm without any interference or modification of the shock tower. 1965-67 Mustangs will require replacing column shaft. 68-70 Mustangs will need the factory column collapsed 1-2" for clearance. Eliminate your leaky control valve and sloppy steering. Feel the road with our new integral power steering conversion kits. We offer both Kits to convert from MS to PS and Factory PS to PS. Please note Factory Ford Pumps work fine with these Kits above Idle but will offer very little power assist under 800 RPM's. We can special order a PS to PS Kit with a modern Saginaw Pump that is more effective at Lower RPM's.

Note: Manual Transmission cars must run a special Clutch Equalizer Bar or a Clutch Cable Set-Up, both are available in the Transmission section (Big Block Equalizer not available at this time). Due to the fact that there are 8 possible kits for 1967, some will cross-over to listed kits, and others are available as special order, so please call. Early 1967 Cars with the Long Shaft that are converting from PS to PS will be required to also purchase a C7ZZ-3304-AD Adapter. 6-cylinder kits available as Special Order.

SUSPENSION

PROGRESSIVE RATE COIL SPRINGS

These springs allow your Classic Mustang to take advantage of the latest suspension technology and perform more

like a modern sports car. They really do give you the best of both worlds. A fairly stock smooth ride during normal driving, but as the springs compress under load (primarily during braking and cornering) they progressively become firmer very quickly to offer the handling characteristics similar to our 600 pound performance springs, but without sacrificing ride comfort. These progressive rate springs are suitable for long pleasant family road trips as well as a variety of autocross and race courses. These are a little more money, but well worth it if you are looking for the best money can buy. Made exclusively for us in the USA by a premier OEM supplier (for strictly race car applications we still recommend our Performance Springs). Our Progressive Rate Coil Springs feature: Hot wind from SAE5160H, oil quench, temper, water quench, shot peen, preset, 100% load test, ground flat and black powder coating. These springs will sit your vehicle slightly lower than our Stock Coil Springs, actual drop will vary with overall car weight. These are not lowering springs. Springs can be trimmed if necessary. We do not recommend big block springs on small block cars.

INSULATOR

Scott Drake added another improved part to the Classic Mustang product line with these new and improved Coil

Spring Insulators. The inner lip is now thicker to prevent tearing and taller to keep it centered in the spring. It also has an added spring indexing stop to help prevent it from moving and allow the spring to seat properly. These coil spring insulators are made from long lasting polyurethane so they last longer than standard rubber ones. 1" version does not have indexing stop.

HEAVY-DUTY STRUT ROD BUSHINGS

These premium bushings are made from Synthetic Elastomer that provides very similar handling performance and longevity when compared to Polyurethane but without the squeaking. This modern material is firmer than OEM Rubber but has a slightly softer durometer than traditional Polyurethane which will improve overall ride quality by eliminating some of the harshness associated with Polyurethane. A great compromise that allows you to get both comfort and performance at the same time. Steel Sleeves and correct Washers included if required. MONTE CARLO BARS

This bar was originally developed by Carroll Shelby to stop shock tower flex and maintain proper wheel alignment during hard cornering. This extra support also helps prevent shock tower stress cracks. Copied from the original design, our bars feature a new thicker diameter tube and improved fender brackets. We have also stamped square holes in the top of each fender bracket to allow for the use of lower profile carriage bolts. We have a variety of finishes to match the look of any engine compartment, and all our bars are individually packaged to protect the finish.

Satin: Our satin powder coat is a perfect match for any billet aluminum under the hood, while retaining the strength of steel.

Black: Our black powder coat has a beautiful finish to compliment the rest of the engine compartment.

Chrome: Our chrome finish has a very bright shine to give your engine compartment some extra pop.

Stainless Steel: Our stainless steel bars will never rust and are so highly polished they look like chrome.

All of our Monte Carlo bars are available in straight or curved versions.

ORIGINAL 4-LEAF REAR SPRINGS

These premium springs are made using high-quality spring steel to assure a smooth, stable ride that will last for years. Features OEM style clamps, correct "hot cupped" ends, anti-squeak pads, front eye bushing installed and OEM 4 leaf design. They will also help lift that sagging rear end. Ford originally listed more than 24 different part numbers for the Mustang between 1964-73. The parts varied only slightly, depending on body style, options, engine size, handling options, and transmission. Scott Drake has chosen 2 different springs as the most universal and one of these should meet most customers' needs. Choose from either C5ZZ-5560 which has a slightly stiffer rate and higher arch. But it may raise your car higher than it's original stock height depending on total weight of the vehicle. This is especially true on early model 6-cylinder cars. Still this is the more popular spring as most customers do not like the traditional slightly lower in the rear look that Mustangs are infamous for. But if an original lower ride height is more what you are after we also offer a Light Duty version under part number C5ZZ-5560-S.

Although we make absolutely no guarantees about actual ride height on your particular car, as there are many variables to contend with, please find the below comparison we did between the two springs to give you an approximate idea of ride heights you can expect. The test was done on a 67-68 coupe and measured at the top center of the rear

wheel arch. (Note: 64-66, 69-70 and 71-73 wheel arches are not exactly the same so their measurement would vary. The test car had 215-70-14 tires on it. On the test car our C5ZZ-5560 measured 26.75" and the C5ZZ-5560-S measured 26". Once again, these measurements will vary from car to car depending on tire size, tire pressure, full or empty tank, and overall weight; but you can expect your car to sit about 3/4" higher with C5ZZ-5560 over C5ZZ-5560-S.

CONCOURS UNDER RIDE

TRACTION BARS

New concours reproduction under-ride traction bars for 64-66 Mustangs are now made by Scott Drake. These are reproductions of the traction bars originally installed on 66 Shelby GT350s by the factory to eliminate axle wrap and wheel hop. They feature authentic details to perfectly match the appearance of the originals. The heavy-wall tubular bars have cast ends with correct "M-1" markings. The unique 3-bolt cast axle mount brackets have accurate "10-70" markings just like they did in 1966. The original bars were made from thin wall tubing and are prone to bending. Scott Drake traction bars are made to handle more power with super strong .187 wall tubing that is twice the thickness of the competition. Each kit is finished in a durable semi-gloss black powder coating for a lasting show quality appearance. Rubber bushings, alignment spacers and zinc plated grade 8 hardware are included. **1967-70 axle mount brackets are fabricated just like the originals.**

Unique 3-bolt cast axle mount brackets feature authentic "10-70" markings.

AUTOMATIC SHIFTER HANDLE

Scott Drake offers the most extensive line of Automatic Shift Handles. Several we are exclusive on. Most Vendors traditionally have sold

C5ZZ-7213-F as being correct for 1964-1973. Although it does fit all years it is only Concours Correct for 1965-1968 Cars. Early 64 cars had a slightly smaller Handle that is not available. However we do now offer the Concours Correct 69-73 Standard Interior Automatic Shift Handle under part # C9OZ-7213-B which is different in overall shape to the C5ZZ-7213-F. 69-73 Owners on a Budget can still use C5ZZ-7213-F. We also offer 67-73 Deluxe Interior Automatic Shift Handles in assorted Colors. Although not original for those that like the feel of Leather over Plastic we offer a Black Leather covered version as well.
